

2027 ASSE Field Trip Program Estimated Air Cost

Airfare is not included in the cost of your Exchange Program Tour Package. Upon registration, we will provide an estimated round-trip airfare based on your selected departure city. This estimated airfare will be added to the cost of your Tour Package. Before selecting your flight, please confirm that your departure airport is correct. If your preferred airport is not listed, contact us so we can assist you and add it if appropriate. Please also coordinate with your host family to ensure they are available to provide transportation to and from the airport. We will always work to secure the best available airfare that meets the requirements of your trip. Because students travel from locations throughout North America, flights must meet specific arrival and departure times based on scheduled activities and ground transportation. As a result, we may not always be able to use the lowest fare displayed online. Airfare estimates are provided as a guide and are subject to change until ticketed. Once your flights are finalized:

- If the actual airfare is less than the estimated amount, you will receive a refund for the difference.
- If the actual airfare is higher than the estimate, you will be responsible for the difference. If the fare exceeds the estimate by more than \$50 USD, we will contact you for approval before ticketing and charging the additional amount.
- Airfare includes applicable taxes and airport fees, but does not include airline baggage fees or potential unaccompanied minor fees.
- Fares may be highly restricted and are generally non-refundable once ticketed.

If you move or need to change your departure airport, please notify us immediately and provide your updated contact information. If your airline ticket has already been issued, you will be responsible for any applicable airline change fees and fare differences.

For questions or assistance with your departure airport or airfare estimate, please contact our travel planner at (800) 553-4723.
